

How We Work

Before Initiation of Project

As any Website Designing request is made, we provide our client with a layout or template of the Home page. This template will show the client that how his home page will look like. We provide with at max 2 samples at a time, from which he/she can decide which one is good for his/her website. In case the client doesn't like any of these two templates then he/she can request for more template. More than 3 time request for the Home Page template may result in additional charges.

After finalizing the Home page design we go for further processing and after that all rates and other factor are decided.

After Initiation of Project

Even after the project get started the client approval and satisfaction will be taken care of. And time to time feedback is provided for the work.

Your Feedback and Approval

To make sure you are completely satisfied with your new website, we will design your website hidden under our domain names. When the first draft of your site is completed, we will provide you the domain name to let you view all pages on the site so if you have any creative feedbacks we will make minor changes as you wish. Step-by-step we will work with you to make sure the site meet your needs and expectations (up to 5 revisions max). Once we both satisfy with the result and agreed to publish the site, then you will pay the last 50% of your balance for our design services. Upon receiving your second half payment we will publish your website to your domain.
